EXPERIENCE

CODING TEMPLE; Chicago, IL

Sep 2017 – present

Software Developer

- Built a full-stack E-commerce application to solve a real-world issue and showcase my knowledge of using HTML, CSS, C#, SQL, Bootstrap UI and ASP.NET MVC 5, Braintree API, SendGrid API.
- Worked with HTML5 and CSS3 to semantic structure in Visual Studio 2015 and Web API to allow my website to access information stored in my database
- Developed a Braintree API payment structure and designed Wireframes for E-commerce Application pages along with C# console application to maintain a card catalog
- MS SQL development, designed a normalized relational database using SQL Server Express
- Project Management.

Select Development Projects:

Lawyer Application and Gem Store

- Built a small e-Commerce application that allowed customers to review products and designed an application with HTML, CSS, Bootstrap UI, ASP.NET MVC 5 and SQL Express to bridge lawyers looking for work and users in need of legal assistance

Amazon Sign-In Page Quiz and Library Card Catalog Developer

- Rebuilt a quiz page using HTML and CSS based on a visual asset and coded a C# console application to easily track and retrieve library books by using serialization to save data on file systems

Weather Application

- Developed a Single Page Web Application to retrieve weather information using the Yahoo weather API by employing a search functionality to display the 5-day weather forecast by city or state

FIVE STAR VALET; Addison, IL

Aug 2008 – present

On-site Event Manager

- Coordinate entire valet team operation of 15 attendants on average at private events and extensive client facing, providing a professional and elegant experience at time of arrival and departure for all clients
- Lead cash manager at all events coordinating payment and distribution for all staff at high-profile events
